Summary

Senior software engineer with 7+ years building full-stack web applications. Strong depth across PHP/Laravel, WordPress, and Node.js; recently evolved into Next.js + React as Learnsignal modernized their platform in early 2026. Comfortable across the full delivery cycle: feature development, deployment to AWS/GCP/Azure, GitHub Actions CI/CD pipelines, and stakeholder-facing project leadership. 4 years prior as Software Development Team Lead at DexterCode running multi-project agency delivery. Best at being a hands-on senior IC or a player-coach tech lead at remote-first product companies.

Technical Skills

- **Current stack (Learnsignal):** Next.js, React, Node.js, TypeScript, JavaScript
- **Backend depth (5+ years):** PHP, Laravel, Node.js, MySQL, REST APIs, third-party integrations
- **Frontend:** React, Next.js, JavaScript, TypeScript, HTML, CSS, jQuery
- **CMS / Platforms (deep prior experience):** WordPress (custom themes, plugins, multisite), Shopify, Zoho
- **Cloud & deployment:** AWS (EC2, S3, RDS, Lambda), Google Cloud Platform, Microsoft Azure (experienced with provisioning, deployment, and operations via Console and scripting)
- **CI/CD & tooling:** GitHub Actions, Bash deployment scripts, Git, GitHub
- **Familiar with:** Docker for local development, basic Linux administration

Professional Experience

Senior Software Development Engineer, Signal (Learnsignal)

June 2024 to Present | Dublin, County Dublin, Ireland | Remote (Full-time)

EdTech platform for accountancy training. Lead developer on the platform, initially on the Laravel/PHP codebase, then evolved with the team as the platform migrated to Next.js in January 2026.

- Build full-stack features across the current Next.js + React + Node platform for a high-traffic learner-facing product
- Previously owned features and maintenance on the Laravel/PHP application before the platform's Next.js migration
- Manage AWS-based deployment and operations (EC2, S3, RDS) using Console and Bash automation
- Maintain GitHub Actions CI/CD pipelines for automated testing and deployment across environments

- Continuously optimize backend performance (query tuning, caching, code refactoring) to support scaling user load
- Cross-functional collaboration with stakeholders to translate business requirements into delivered features
- Participate in code reviews and architectural discussions for the engineering team

Software Development Team Lead, DexterCode

Sept 2020 to July 2024 (3 years 11 months) | Islamabad, Pakistan

Led delivery for multiple concurrent client projects across Laravel, Shopify, and WordPress.

- Guided team development efforts toward successful project delivery across multiple strategic client engagements
- Provided technical leadership through coaching, mentorship, and one-on-one growth conversations with team members
- Established quality standards through structured peer code reviews, especially for Laravel and PHP architectural decisions
- Collaborated with business analysts, software architects, and developers to plan, design, and ship web-based business solutions
- Assisted with requirements gathering, user-story development, estimation, and project planning
- Authored system documentation including user guides, API specifications, and architectural diagrams
- Provided third-tier (escalation) support to business users on complex production issues
- Drove adoption of Agile delivery practices to reduce backlog and improve sprint predictability

Senior Software Engineer (Part-time freelance retainer), The Ingenio Marketing LLC

January 2020 to May 2026 (6+ years) | West New York, NJ, USA | Remote

Long-running freelance retainer (roughly 3 to 4 hrs/week) for WordPress, PHP, and AWS maintenance on existing client web properties. Wound down to focus on full-time work.

- Maintained and extended custom WordPress themes/plugins and Laravel/PHP modules for client web properties
- Managed AWS infrastructure (EC2, S3, RDS) for hosted client sites; tuned for cost and reliability
- Implemented on-demand feature requests and integrations with third-party APIs
- Built CI/CD and deployment automation to support continuous delivery on client systems

Senior Software Developer (Part-time freelance retainer), Dr. William Rahal

January 2020 to May 2026 (6+ years) | Beverly Hills, CA, USA | Remote

Long-running freelance retainer (roughly 3 to 4 hrs/week) for WordPress and PHP maintenance work. Wound down to focus on full-time work.

- Maintained custom WordPress themes and plugins; performance-optimized, SEO-aware updates
- Built PHP backend functionality and third-party API integrations to support evolving business logic
- Implemented caching and load-time optimizations on existing sites to maintain performance under traffic growth

Junior Web Developer, Corporate Research and Investigations Limited

June 2019 to August 2020 (1 year 3 months) | Islamabad, Pakistan

- Designed and developed PHP-based websites and internal portals (HRMIS, Audit Portal, event scheduler, learning management system, test management system)
- Collaborated with designers to deliver clean, intuitive UIs for portals serving 2,000+ internal users
- Owned QA testing protocols to find bugs and improve usability before production releases

WordPress Developer, 2 Web Design

September 2018 to May 2019 (9 months) | Saskatchewan, Canada | Remote

- Designed and developed 30+ WordPress websites for clients across diverse industries
- Built interactive web applications including registration/membership systems, event schedulers, and a learning management system
- Provided client support and resolved technical bugs on live websites
- Collaborated with graphic designers to implement clean, intuitive interfaces

Education

- **MS, Project Management**, Bahria University, Islamabad (2019 to 2020)
- **BS, Computer Science**, Bahria University, Islamabad (2014 to 2018)
- **Higher Secondary School Certificate (Pre-Engineering)**, Preston Boys College (2011 to 2013)

Certifications

- Salesforce
- Project Management Foundations
- PHP: Object-Oriented Programming with Databases

Languages

- **English:** Professional Working
- **Urdu:** Native / Bilingual
